DESIGNED AS A  
LAYERED MODEL

COMPLETE CLOUD  
SOLUTION

vSTAX Protect is an enterprise grade, fully automated, scalable and reliable backup solution. Your data is backed, compressed, de-duplicated and secured with AES256 encryption before it is sent to our vaults, that are housed inside one of our UK datacentres. Your data is then replicated to one of our secondary datacentres for resilience.

## IS DATA PROTECTION A CHALLENGE FOR YOUR BUSINESS?

Protecting data is critical to the performance of any business. The use of traditional methods, such as tape and disk backup, is inefficient, costly, unreliable and increasingly puts you and your organisation at risk of non compliance. vSTAX Protect uses best of breed cloud technologies to deliver fast, efficient and secure offsite backup and recovery, ensuring that your data remains safe both now and in the future.

### Security, Resilience and Compliance

Secured with AES256 encryption in transition and at rest.  
Data is replicated for resilience.  
Encrypts and stores all customer backup to ISO27001 and CIF standards.  
Our Tier II Datacentres are UK based, ensuring no issues with governance or compliance requirements for EU or legislative data control.

### Business Continuity

Enterprise grade, highly available data repository.  
Rapid restoration even via ADSL bandwidths. Local LAN cache for LAN speed restore.  
Recover and restore your backup data to any configured Data Recovery Point within a guaranteed SLA.  
Can be integrated with vSTAX Recover.

### Data Protection Technologies

Powered by Asigra, the industry leader in enterprise backup.  
Automated technology backs-up, compresses, de-duplicates and secures data with encryption.  
Fully integrates with virtualisation, traditional file services and legacy application servers.

### Delivery and Pricing

Delivered as a DRaaS Model.  
Flexible Pricing Model—Can be purchased as a Pay as You Go (PaYG) pricing model or as a capped model with unlimited backup and restore requests..

## Environments Supported

SAP	Android Devices	Adobe
Microsoft SharePoint SQL	EMC & NETAPP CIFS Shares	Apple Macintosh OS X and iPhones
Microsoft SQL Server Exchange	Microsoft Windows	Office 365
Oracle		Linux

# BENEFITS

## Improved Efficiency

Agentless—no additional investment in hardware or software is required.

Totally managed solution, alleviating IT staff from having to manage other backup systems thus enabling them to carry out more productive tasks.

Minimises costs due to lost productivity.

Automation reduces potential for human error.

## Cost Effective

Offers long term operational efficiency through our low cost subscription based pricing model.

Eliminates costs associated with recreating lost data.

Reduces IT administration costs.

Tax efficient—write off 100% as a business expense.

Cost saving when compared to traditional methods such as tape backup.

## Enhanced Capability

Rapid restore due to local backup cache held on your site.

Protects all of your servers, both physical and virtual.

Automated incremental data backups with rich data reduction techniques reduces backup time data space used and avoids duplication of information.

Flexible recovery—we can recover servers, both virtual or physical, laptops and mobile devices, or the entire company infrastructure, depending on your data loss.

## Business Advantages

Fully customisable scheduled backups, data retention, data deletion and data archive rules are agreed and configured in line with the individual needs of your business.

You retain complete control over all of your backed up data.

Eliminates reliance on traditional methods of backup which are inconsistent and unreliable.

Scalable to incorporate more devices and more data, ensuring your business is fit for the future.

# DEPLOYMENT

Stack Group work with you to understand your business needs and design a custom back-up solution for your business. After the first and only full-back-up of your data is taken, subsequent automated back-ups will be planned and scheduled, allowing vSTAX Protect to be deployed within days.
