

vSTAX® Talk

Delivers simple and powerful Unified Communications to your business

• vSTAXTalk

vSTAX Talk delivers powerful IP Telephony and Unified Communications (UC) to your business. Provided either on-site, as a hosted cloud solution, or as a hybrid, vSTAX Talk offers a fully-managed UC service to your workforce. With vSTAX Talk, enabling staff mobility, streamlining your telephone infrastructure and reducing the cost of your communications strategy is both simple and cost-effective.

The ability of an organisation to communicate is crucial to its success.

Maximise your communications strategy with vSTAX Talk

VSTAX® Talk Features

VOIP Phone Systems

Customisable phone systems which meet the needs of your evolving business, vSTAX Talk can provide a VOIP solution which guarantees the lowest total cost of ownership of any voice platform on the market.

Video Conferencing

High definition, real time video streaming allowing you to conduct meetings with multiple people at multiple sites. Minimise the need for costly and time consuming travel, whilst maintaining face-to-face relationships with clients and colleagues.

Mobile Solutions

Wireless networks which minimise mobile call costs both within and outside of the UK.

Call Recording

Call recording technology including features to search, record, play and archive calls. Our call recording solution is PCI compliant.

Line and Data Services

Line rental, broadband, leased line and MPLS networks.

Contact Centre Applications

Customisable call routing and automation can be integrated with enterprise applications for advanced business intelligence.

Hosted • Cloud • Hybrid

vSTAX® Talk – Audit

As part of vSTAX Talk, we offer a free communication audit which will review your current infrastructure and allow us to make suggestions as to where you can make improvements and cost savings. For more information, or to book an audit, please call 0151 521 2202 or email info@stack.co.uk

Delivering vSTAX® Talk

Stack Group have successfully delivered vSTAX Talk to a wide range of organisations, each of which have their own unique requirements. Examples of work carried out by our vSTAX Talk team include the implementation of a digital IP Unified Communications solution at one of the UK's leading train operators and the deployment of a hybrid voice system at one of the region's leading solicitor's firms. This involved migrating the firm to a fully managed hybrid UC as a Service (UCaaS), which featured call recording and a contact centre application for greater functionality and efficiency.
